General Specifications

- Maximum Travel : 14 MT
- Maximum Levels : 5 Stops / 17.1 MT
- Pit Depth : 120 mm - No pit with optional short ramp
- Installation Place : Inside - Outside
- Drive Train : Winding Drum Machine with Encoder (Made in Italy)
- Machine Control : Preprogrammed variable frequency drive (Made in Turkey)
- Rope : 8 mm standard: Turkish quality, on request: German quality.
- Transmission : Ultra-low vibration, 3-stage, right-angle, helical-bevel drive.
- Noise Level : 54db ventilator OFF - 56db with ventilator ON.
- Encoder : FNC 50 H(*EC)
- Cabin Ceiling : LED Spot Light - Spot Light
- Cabin Operating Panel : Intercom - Alarm - Emergency Stop Button (GENEMEK brand made in Turkey)
- Overload Indication : Built in on COP
- Cabin Flooring : Pvc - Wood
- Cop : Intercom - alarm - fan - emergency stop button (COP-LOP made in Turkey)
- Cabinet Ceiling : Etched steel or wood with spot light.
- Shaft Construction : Profil
- Door Type : Swing manuel door and swing semi-automatic choice
- Door interlocks : Italian brand - (Made in Italy)

Color Options

Our ESP painting method reflects itself in a shiny surface, flexible & durable coating which is less liable to chip or peel. All used materials are appropriate for inside or outside use with no VOC content.

8 LAYERS OF SAFETY

SAFETY

Photosell Sensors 1

This high quality light sensor will force the lift to stop immediately when passengers or objects approach the exit of the lift while in use.

2 Mechanical Guide Rails Brakes

Even if all the cables snapped, the elevator still would not fall to the bottom floor. Thanks to the passive, automatic, built-in braking system these brakes will lock in place whenever the elevator starts to fall faster than an allowed amount.

3 Overload Sensor

When the car is overloaded, the elevator won't move and will give a sign on the COP.

4 Limit & Emergency Stop Switches

These switches will assure stopping the car when the lift reaches or passes its final destination or in case of emergency.

5 Machine Brake Hand

In case of emergency this system allows the technician to free the car and make it descent to the closest down floor.

6 Magnetic Lock Switch

To ensure that the door of the elevator can open only if the car is available and the elevator is not in use.

7 Overspeed Governor

This device is specifically designed to stop the lift if it runs beyond the prescribed speed.

8 Rescuing System UPS with Support

This is a battery backup system that provides backup power when the regular power source fails or voltage drops to an unacceptable level. In that case, the battery mode is automatically turned on.

What Makes us Unique?

Smart Civil Work

This lift is an ideal solution to be installed on the exterior face of the building, in the lobby, or at a place where it can enhance the elevation and the 'look&feel' of the building. We introduce you to an electrical home elevator that requires no supporting wall, pit, or hydraulics vacuum systems. Just plug it into your domestic electrical socket and start moving up & down!

Minimal Maintenance

This is an electrical self-supporting elevator. No use of oil, vacuum systems, or counterweights. This means less maintenance and saves a lot of additional costs and time during the installation-process.

Plug & Play

These Elevators come as a semi-assembled unit just install, plug and play. No surprises!

Self Supported Structure

this elevators that does not require any supporting beam, column or walls. All you need is the space!

Panoramic View

The unique glassy sightseeing capsule enables the passengers to have eye contact with the surrounding area, even when the lift is in motion.

Green Elevator

This elevator is made of eco-friendly raw materials that are harmless when damaged. It requires the least amount of assembly and maintenance resources and consumes less energy when in use compared to the other traditional elevators.

Noise

you can count on a smooth moving system with no commotion.
